

Bale in a Bag

Barley Straw Kit

Directions for Pond Application:

1. Cut bag and fold open
2. Cut 2 bale strings (Caution: Strings under tension!)
3. Place empty 2-liter bottle in each mesh bag.
4. Fill mesh bags with Barley Straw, draw strings and tie securely.
5. Tie plastic tie-down string to each bag.
6. Attach a weight (rock or brick) to each string, leaving enough length to allow the bag to float to the surface, and toss into the water.

Alternate method: Secure string to stake next to water

7. Locate bags in areas of greatest water movement.

Additional material required:

3 flotation devices (empty 2-liter Soda bottle or plastic milk jug)

3 weights (Brick/rock) or Stakes
